

Dm vs Dw conference call, 6/27/2019

Stephen Kry, Catharine Clark, Joerg Lehmann, Enrico Clementel, Jessica Lye, Paige Taylor, Coreen Corning

It was decided to pursue writing a position paper on behalf of the GHG endorsing the use of Dm.

Action items:

Joerg will check with Tomas Kron to see if he was working on something in this space (beyond the TROG position paper). If so, work will be coordinated.

Catharine will check with Jonny to see if he would prefer to 1) write up his clinical bone assessment himself (or as a stand alone work) or 2) have it be included in the GHG position paper.

Joerg reach out to David Thwaites to see if the Green Journal would be receptive to this sort of contribution.

Coreen will schedule the next conference call at the end of July.

Stephen and **Jess** will skeleton the position paper based on the three main points discussed during the call:

- 1) Scientific rationale/considerations for Dm vs Dw
- 2) Clinical implications for trials (Jonny's dose to bone section)
- 3) Endorsement of Dm position
